DPD-3318-61

29 May 1961

MEMORANDUM FOR : Chief, Air Proprietary Branch, DPD-DD/P
SUBJECT : C-46 Maintenance Equipment
REFERENCE : Your memorandum DPD-2750-61, dated 3 May 1961

1. Reference your request, a list of C-46 aircraft ground support equipment and special tools with dollar costs have been compiled and submitted herewith as an attachment to this memorandum.

2. The list of items was composed on the basis of support for one aircraft and therefore various items would be required to support an increased inventory.

3. The total cost of support equipment and special tools is based on Air Force Stock listing. This cost would vary based on procurement through commercial sources.

4. It is quite conceivable that if the aircraft in question is operated from a commercial field supporting airline or charter flights, a number of items contained in the ground support list could be possibly rented or leased. This action could possibly result in additional dollar savings and is recommended for your consideration.

5. Guidelines for the listing of aircraft support equipment and special tools are voluminous and varied. Every effort was made to reduce the listing to a minimum, but due to variables in experience of operation, location, and weather, this list might not accurately reflect all your needs. Please accept the attached listing with these factors in mind.
